

Australian IPF Registry

Data Manager

Opportunity to contribute to a unique and internationally acclaimed national Registry and research project using an innovative platform

The Australian IPF Registry is a unique national research resource that has been facilitated by Lung Foundation Australia. The Lung Foundation is the only national charity devoted to serving everyone in Australia with a lung disease.

The Registry is seeking a part-time Data Manager as data cohort is substantial, dynamic and researchers request data regularly. State Coordinators collect and enter an ongoing series of participant and physician surveys and the results of medical investigations and expert panel reviews into a remote access database.

This strategic role, reports to the Australian IPF Registry Project Manager and will be responsible for developing and implementing all data management processes, including data verification, quality control and exporting high quality research data as well as providing advice on database maintenance and development. The protocols and procedures developed by the Data Manager will ensure that the Registry meets its full potential by providing complete and accurate data for research in a timely manner.

This hands-on position requires a proactive Data Manager who can combine sound data management skills with an understanding of using data in health research, and who has sufficient experience in working with substantial data sets and data management software to work independently and provide advice. As a unique national Registry in IPF with international standing this project and the Data Manager role are uniquely placed to influence future initiatives.

The position may also provide the future additional opportunity to work as the part-time Data Manager the Australasian Bronchiectasis Registry, part of the Lung Foundation Research area.

To be an integral part of the Registry, an exciting, unique and recognised development in IPF research in Australia and internationally, please contact for any enquires or to forward your application addressing the key areas of responsibility and required attributes in the position description to:

Sacha Macansh, Project Manager Australian IPF Registry by telephone 02 9515 3996, mobile 0416 491 520 or by email sacha@lungfoundation.com.au

Applications close Wednesday 19 April 2017.

Position title: Data Manager

Organisation: Lung Foundation Australia

Location: To be agreed. A co-location with one of eight Registry Principle Investigators or potentially at a suitable existing employer in one of these capital cities (see Position Description)

Employment status: Fixed-term part-time, 1 day per week or equivalent until 31 December 2017 with a view to be extended with project extension.
